NEW KOREAN CHRYSANTHEMUMS

**EARLIEST
TO BLOOM**

These new creations are especially fine for cold climates where the ordinary chrysanthemum winter-kills. They are hardier, most attractive with their lovely new pastel shades, and early flowering. The Korean Hybrids are undoubtedly the greatest advance made in years in chrysanthemums.

**HARDIEST
OF ALL**

MARS (1)—Deep amaranth-red, changing to wine red, overlaid with a velvety sheen. A distinct and striking color effect. Height, 2½ feet.

DAPHNE (2)—Altogether a new shade of pink to the chrysanthemum. An exquisite blending of Daphne-pink, with an underlying sheen of lilac rose, enhanced with prominent golden stamens in the center. The single flowers, 3½ inches in diameter are carried in graceful sprays.

MERCURY (3)—The 3-inch, single flowers open bronze-red and change to coppery bronze as they mature, a charming effect in the garden. The graceful sprays when cut keep two to three weeks. Height, 2 feet.

DIANA (4)—A new color-note for the garden, Chatenay-rose-pink, mingled with lilac rose and soft salmon, the tones of which vary with the degree of light. The triple rays of petals give an appearance of fullness that is none the less dainty. Height, 2½ feet.

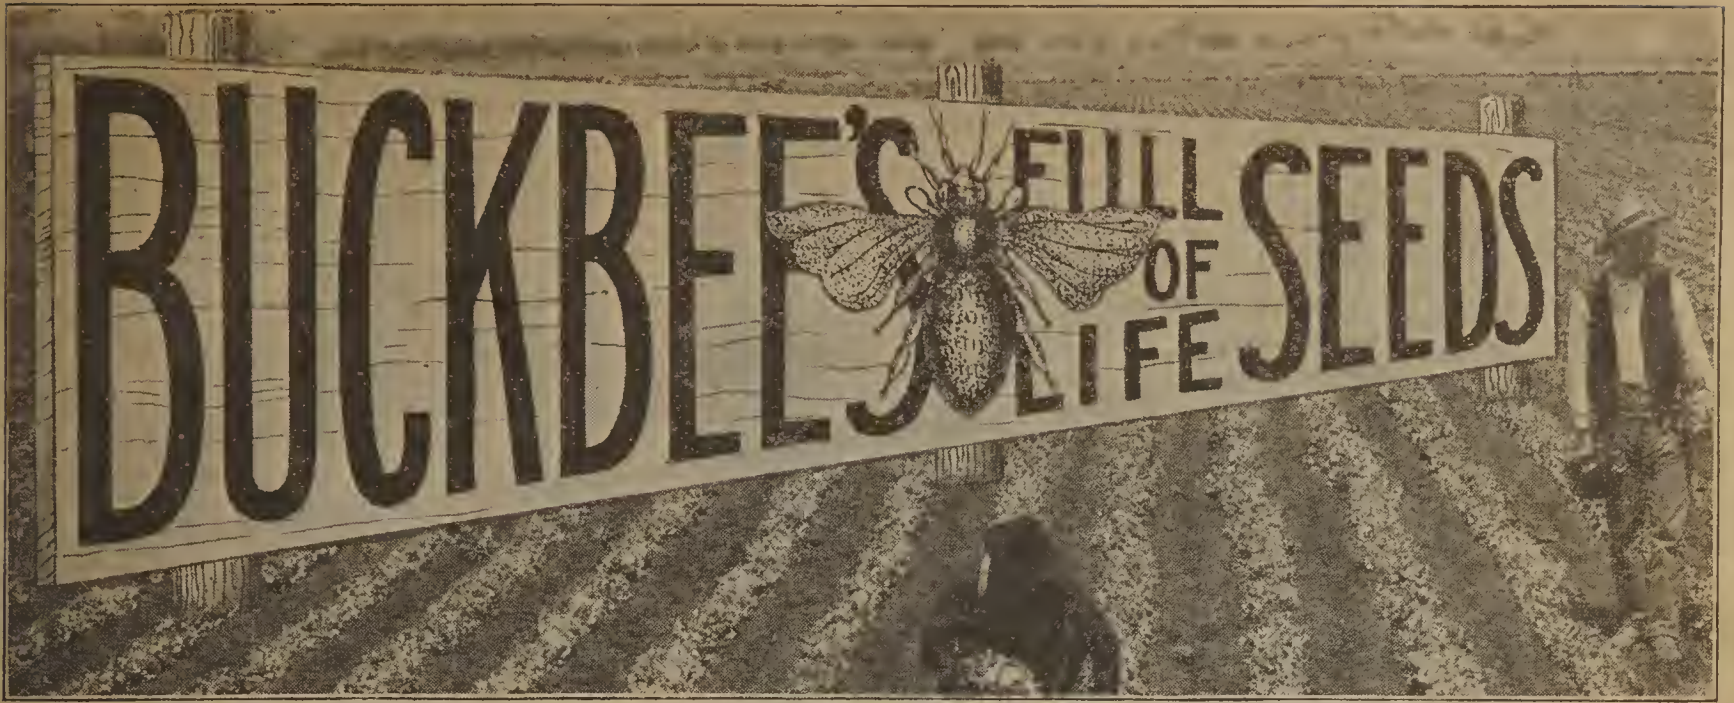

APOLLO (5)—Superb autumn color—a sparkling combination of bronze, red, and gold suffused with glowing salmon. The single flowers, 2 inches across, are produced in immense sprays. Long flowering period. Height, 2½ feet.

CERES (6)—A lovely combination of old-gold, cham-oiis-yellow, and soft coppery bronze. The mature flower petals appear as if dusted with gold. Handsome sturdy plant producing a quantity of nicely formed single flowers in branching sprays. Height 2½ feet.

LAWN GRASS SEED and FERTILIZERS for Beautiful Lawns

Our Famous Lawn Grass Seed

MAKES A PERFECT LAWN. HARDY, LUXURIANT, ALWAYS GROWS

How to Have a Beautiful Lawn

Our lawn grass seed produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm, deep and elastic turf, is generally ready for mowing in six weeks from time of sowing and is composed of a thoroughly balanced combination of native and foreign fine-leaved, deep-rooting grasses of interweaving habit, that flourish under varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward free from clumps is maintained from snow to snow without burning brown in the hot months of summer. A lawn may be established either by "sodding" or "seeding." The latter is not only much less expensive but much more satisfactory, as better grasses can thus be obtained, and the quality and variety of the grasses have a great deal to do with appearance and the permanency of the lawn.

Shady Place Lawn Grass Seed

THE VERY BEST OBTAINABLE—CAREFULLY BLENDED—YOU CAN HAVE A
BEAUTIFUL LAWN WITH VERY LITTLE WORK, BY USING
OUR WELL BALANCED MIXTURE

On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into grass, but with this mixture there need be no further difficulty. It is a combination of fine dwarf-growing, evergreen varieties which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Ground that has been densely shaded by trees is frequently "sour" and if the drainage is defective it is apt to be covered with moss and coarse bog grasses. In such cases an application of slake lime, at the rate of one bushel to each thousand square feet, or 40 bushels to the acre, is an excellent corrective and sweetener, but the moss should be first removed.

Price, postpaid, 1/2 lb. 35c; lb. 65c; 3 lbs. \$1.80. By express or freight, not prepaid, 5 lbs. \$2.75; 10 lbs. \$5.25; 15 lbs. \$7.50; 25 lbs. \$12.00.

Velvet Green Lawn Grass Seed

A SPLENDID STANDARD MIXTURE

This special mixture does not include so great a number of expensive grasses as our "World's Fair Mixture," but full provision is made for a succession of growth and a careful blending in proper proportion and thoroughly mixed for quickly producing a permanent, thick and velvety sward of uniform growth and rich green grass free from coarseness.

Price, postpaid, 1/2 lb. 30c; lb. 55c; 3 lbs. \$1.50. By express or freight, not prepaid, 5 lbs. \$2.25; 10 lbs. \$4.25; 25 lbs. \$10.00.

White Clover for Lawns

A low growing clover, spreads rapidly and is very hardy; round, white, fragrant heads, which make excellent pasturage for bees. It grows on most any kind of soil, but succeeds best on moist ones.

Combination Lawn and Garden Invigorator

The Marvelous Lawn Tonic—The Wonder Fertilizer—
The Unequalled Garden Medicine.

Made in Rockford—This Is Not an Experiment But Has
Been Used for Years with Excellent Results.

Extensive experiments have convinced us that this unequalled Fertilizer or Garden Invigorator is the most wonderful product of its kind ever offered. This last season we have given it final and exhaustive tests, which have proven beyond a doubt that it should be used in every State in the Union. No matter for what purpose, or under what conditions it was used, the results were always the same—simply marvelous.

A Petunia Bed, with our combination Invigorator sprinkled lightly on the soil, showed an increase in size of the flower, and more brilliant colorings. Vegetables planted in poor soil in July when others were well started towards bearing, not only made heavier yields, but matured almost as soon as the earlier planted garden. Lawns with an application of 25 pounds to 1000 square feet grew heavier sod of a richer color, and were still as green on December 1st as in the Summer time. Keep a bag on hand always. You will need it almost the year round. Packed in 3 size bags to meet all requirements. Shipped by Express or Freight at buyer's expense. 25 lbs. \$1.65; 50 lbs. \$2.60; 100 lbs. \$4.25.

ASPARAGUS SEED

New Washington Rust Proof

Developed by the U. S. Department of Agriculture

The New Giant Rust-proof Variety. Plants grow rapidly and produce uniformly long shoots of superior table qualities. An asparagus bed is a permanent investment, therefore plant the best obtainable. Pkt. 10c; oz. 20c; ¼ lb. 35c; ½ lb. 55c; lb. \$1.00, postpaid.

New Mary Washington

This variety seems to be the top-notch among rust-resistant sorts. It is very early, producing large shoots even the second year from seed. These are very large, frequently an inch in diameter, with a tendency to be oval in cross-section. Its high-branching habit makes it possible to put shoots with good tight tip buds, as much as 2 feet long. The seeds of New Mary Washington are large and produce strong, thrifty seedlings right from the start. Pkt. 7c; oz. 15c; ¼ lb. 35c; ½ lb. 55c; lb. \$1.00, postpaid.

Buckbee's Perfection

Large, Tender and Delicious. Our Best Seller

Brussels Sprouts

Washington Rust Proof

MATCHLESS—The finest strain of sprouts. The plants are of strong, vigorous growth, closely jointed and are covered the entire height with very large, solid, tightly folded sprouts of exquisite quality. The plants are quite hardy, are not injured but improved by hard frosts and are left in the gardens or field during winter until wanted. These miniature Cabbages may be boiled like cabbages or cooked in cream like Cauliflower. They are the most delicious and delicately flavored variety of the Cabbage family. Pkt. 10c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; lb. \$2.00, postpaid.

Buckbee's Improved Bush Lima

Superior Quality, Exquisite Flavor, Fine Color, Good Shipper, Hardy Grower, Enormously Productive, Matures Early, Excellent Keeper

This is the very "newest" in the Bush Lima Bean. It greatly excels all other Bush Limas in productiveness, being practically loaded down with pods continuously from early Summer till frost. It matures extremely early. Is suitable, therefore, for all sections North and South, and is a continuous bearer until frost. In size the Beans are what might be termed intermediate, not so large as the Burpee Bush Lima, but considerably larger than the Henderson's Bush Lima, making it, in our estimation, the finest size for all purposes. The bush is sturdy in habit and about 24 inches high, having good large leaves. It bears its fruit on long spikes in heavy clusters well out from the plant. There are several pods in each cluster, as many as ten having been counted. Each pod contains on an average of four Beans, though there are more containing five than three, so you see that it is a great improvement over the old-fashioned Bush Limas which oftentimes have only one or two in a pod. Considering the large number of pods on a bush, the yield is amazingly enormous. In quality the Bean is par excellence, flavor unsurpassed, and color the very best, both before and after cooking. Valuable also as a shell bean for winter use. 2 oz. pkt. 10c; ½ lb. 25c; lb. 45c; 2 lbs. 80c, postpaid.

Burpee's Bush Lima

Erect, stout bushes, 18 inches high, and with a diameter of 2 to 3 feet. Very productive. Large pods filled with large beans of luscious quality. 2 oz. Pkt. 10c; ½ lb. 17c; lb. 30c; 2 lb. 55c, postpaid.

New Jackson Wonder Bush Lima

Medium Size, Beautifully Colored Speckled Beans

This is the most productive and very earliest of the Bush Limas. It is of true bush form, about 2 feet high, bearing in greatest profusion, broad, flat pods, each having from three to five medium-sized, handsomely speckled Beans, which cook quickly and are of superior quality. Good for Summer use, and as Winter shell Bean. A splendid Bean for the home garden. 2 oz. pkt. 10c; ½ lb. 17c; lb. 30c; 2 lbs. 55c, postpaid.

Burpee's Improved Bush Lima

The Earliest Large Seeded Bush Lima. One of the Best for Market as Well as the Home Garden

This is the earliest of the large seeded Bush Lima Beans. The first pickings fit for the table may often be taken in July and from that time until frost a continuous supply may be gathered. It is fully 8 days earlier than the old Burpee's Bush Lima and produces larger pods and more and larger Beans in the pod than this variety; the seed is also considerably thicker. The plants grow upright about 30 inches in height and often measure 24 inches across the top. 2 oz. pkt. 10c; ½ lb. 20c; lb. 35c; 2 lbs. 60c, postpaid.

BUSH LIMA BEANS

Fordhook Bush Lima

Exceptionally Fine Quality. The Leading Bush Lima in the East. An improved Dreer's Bush Lima. The plant is vigorous and erect growing, bearing the pods well above the ground. The pods, which are produced in large clusters, are medium green, about 4 3/4 inches long, and each contains three to five large Beans of exceptionally fine quality. Seed large, irregularly oval in shape, very thick, white with greenish tinge. 2 oz. pkt. 10c; 1/2 lb. 25c; lb. 40c; 2 lb. 70c, postpaid.

Henderson's Bush Lima

Compact bushes one foot high. Valuable on account of its earliness and productiveness. Pods are medium dark green, about 2 3/4 inches long and contain from 2 to 4 Beans, which are of excellent flavor; either green, shelled or dry. 2 oz. pkt. 10c; 1/2 lb. 17c; lb. 30c; 2 lb. 50c, postpaid.

1 1/2 pounds will plant 100 ft. of row. Sow 60 lbs. seed to an acre.

Beans are the one vegetable that will grow anywhere. It is useless to plant them before the ground has become warm, and danger of early frost is past. Plant 1 1/2 to 2 inches deep in rows 1 1/2 to 2 ft. apart and 2 to 4 inches apart in the row. Cultivate thoroughly until they commence to bloom, but never when the ground or plants are wet with rain or dew, as it would be sure to injure them and cause them to rust.

Our Garden Seeds are the best that money can buy, at our new low prices

HENDERSON'S NEW BUSH LIMA BEAN.

MANGEL WURZELS

Any land that will grow a good crop of Corn will produce a good crop of Mangels or Sugar Beets, which are surer crops than any other root.

Mangels give one-third greater increase of milk in feeding cows than does the same weight of Potatoes. Forty tons Mangels (a crop of an acre) have as much nutritive matter as 130 bu. of corn and are more digestible. Send to Secretary of Agriculture, Washington, D. C., for Special Bulletin on Mangels and Beets. Plant five pounds of Seed per Acre

SUGAR BEETS FOR STOCK FEEDING

Seeds Are Bred for Disease Resistant Qualities

Buckbee's Giant Feeding Sugar

The Greatest Beet for Feeding Stock

The magnificent Sugar Beet, while giving nearly as large a yield of easily grown and harvested roots as a crop of Mangels, supplies a food of very much higher nutritive value, being much richer in sugar. They yield, under equally favorable conditions, more than double that of sugar beets and, not being so sweet, are less liable to injure the kidneys when fed in large quantities. The roots grow about two-thirds out of the ground and because of this and their shape the crop can be harvested and stored at less expense than any other root crop. Roots very large, smooth, clean and of oval shape; white skin, white flesh. Every farmer should try it. Oz. 7c; 2 oz. 12c; 1/4 lb. 18c; 1/2 lb. 32c; 1 lb. 60c; 2 lb. \$1.10, postpaid.

Buckbee's New Imperial Sugar

This Beet is the result of years of methodical and persevering selection. It is extremely rich in sugar, thousands of analyses showing that the average percentage of sugar obtained from this variety is about eighteen and its average yield may be stated as from 15 to 16 tons an acre, but crops of 25 to 40 tons per acre have been obtained off it. Flesh finely grained and very sweet. We sell thousands of pounds each year to the large growers and Beet sugar factories through the country, always with the most satisfactory results. Oz. 7c; 2 oz. 12c; 1/4 lb. 18c; 1/2 lb. 32c; 1 lb. 60c; 2 lb. \$1.10, postpaid.

BUCKBEE'S SPECIAL HOG PASTURE MIXTURE

This mixture is composed of the following annual varieties: Field Peas, Soja Beans, Vetches, Cowpeas, Crimson Clover, Rape, Sugar Cane, Japanese Millet, Turnips, Rutabagas, Speltz, Rye and other grains and forage plants, all in the right proportion. This mixture will provide an abundant pasture, within six weeks from day of sowing the seed, continuing green and bountiful until destroyed by frost; almost all of these varieties will come up again as fast as they are eaten down and will furnish 4 to 5 times as much forage as can be obtained from any clover-grass mixture, and this food is succulent and nutritious and much relished by hogs; it will keep them healthy and strong and they will gain in weight easily and quickly. This mixture will prove a most profitable investment for every farmer, not only for feeding hogs but also all other farm stock. It is usually sown about corn planting time, but can also be sown as a catch crop any time during the season until August. Use 100 pounds for 2 acres. BUCKBEE'S Famous Great Dane

The Hardest Headed Late Cabbage. The Gardener's Favorite, the Best Shipping and Longest Keeping Cabbage

For years large quantities of Danish Cabbage have been imported to our leading markets, the heads being of such solidity that the demand has been far in excess of the supply, and always at a price far above the ruling market rate. To get to the source of this supply we sent an expert to Denmark, who after careful inspection of the Cabbage-growing localities found at the Island of Amagar the GREAT DANE Cabbage, which he considered by far the finest and most productive of all the types and strains of the Ball Head Winter Cabbage grown in Denmark, and he contracted with its originator for all the seed he could supply.

We give herewith the description of this great Cabbage—by the originator, Mr. Torgeson: "For more than twenty years I have worked in perfecting this variety. The stem is medium sized, heads are almost as round as a ball, of good size, perfectly solid, very fine grained, of the best quality. They average larger and heavier, also mature earlier than the other strains of Hollander or Ball Head grown here. Because of the larger size, heavier weight, greater solidity of its heads, its unequalled keeping and shipping properties and its more tender quality, it will supplant all other varieties for winter use. I cannot too highly recommend it to gardeners in your land (America)."

We control the entire seed supply and offer the choicest "FULL OF LIFE" Seed (grown by the originator in Denmark), at the following reasonable prices. Send to Buckbee for the true "Great Dane."

Pkt. 10c; oz. 30c; 2 oz. 55c; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. \$1.80; lb. \$3.25; 2 lbs. \$6.00, postpaid.

It is advisable to sow as early in the Spring as the ground is fit to work, though good crops may be grown from sowing as late as June 15. For table use sow the smaller kinds early in rows 16 to 18 inches apart. For field culture sow in drills 18 to 24 inches apart, using from 1 ½ to 3 pounds of seed to the acre. Cover ½ to 1 inch deep and see to it that the soil is pressed firmly above the seed. As soon as the plants appear, use the cultivator or wheel hoe. BUCKBEE'S "Full of Life" SWEET CORN

Buckbee's Everbearing

If You Want Delicious Corn on Your Table the Fourth of July Plant This Extremely Hardy, Early Maturing, Large Eared Sort

We have produced in this early corn a variety which stands alone as a money maker. It is in the same class as the Earliest of All Sugar Corns, considerably larger and, best of all, contains a sweetness equal to most true sugar varieties. It has the power of germination under conditions where all others have failed and can safely be planted much earlier than any true sugar corn on account of its extreme hardiness. It adapts itself to any kind of soil, either sand or heavy clay.

It is as large as Stowell's Evergreen. The fodder grows 6 feet high. The ears are of good size and covered with kernels clear to the end of the cob. Each stalk will produce one to two well developed ears. Now, if these are picked when mature, one or two and even four more ears will set and develop on the same stalk during the next two to four weeks. Pkt. 10c; 1/2 lb. 23c; lb. 40c; 2 lb. 75c, postpaid.

Buckbee's New Early Sunrise

Absolutely the Earliest Good Sweet Corn

The beauty and quality of this remarkable variety give it prominence over all others for family, market, canning, shipping, and, in fact, all purposes. Ears large (the fat kind), grains of great depth, exceedingly tender and sweet, the sort that fairly melts in the mouth. Something in Sweet Corn that makes everybody talk Early Sunrise as the very best introduction to present date. Our seed stock is carefully grown and selected with the sole object of keeping it up to the highest standard of excellence as the earliest, largest and best on record. This is a very distinct variety, which was originated many years ago by a market gardener in northern Iowa. With us it always proved earlier than any other so-called extra early variety of other seedsmen. The ears are about 6 inches long, 10 to 12-rowed; they are very uniform and handsome and have a small white cob. Pkt. 10c; 1/2 lb. 25c; lb. 40c; 2 lbs. 75c, postpaid.

Country Gentleman

This variety is often called the "Shoe Peg" Corn, owing to the arrangement of the crowded kernels, which are long and very sweet. Considered by many the best of the late varieties, as it remains tender and fit for use longer than most sorts, as the ear is enclosed in a thick husk, which keeps it "in the milk." Slender, very deep, white, very tender and lusciously sweet. Pkt. 10c; ½ lb. 20c; lb. 35c; 2 lbs. 65c, postpaid.

Kingscrot Golden Bantam

(Market Gardeners Strain)

This variety matures in 73 days, and is from a week to ten days earlier than the ordinary Bantam strains, and has the true eight row Bantam ears. It is much more uniform in maturity and plant characters. Foliage is of darker green color, enabling it to resist drought better. It grows almost as tall as the ordinary variety and ears are nearly as large. Its quality is excellent and it is a favorite with market gardeners who prefer the true eight row Bantam type. Gardeners usually pick the entire crop for market at one picking. Pkt. 15c; ½ lb. 30c; 1 lb. 50c, postpaid.

Golden Cross

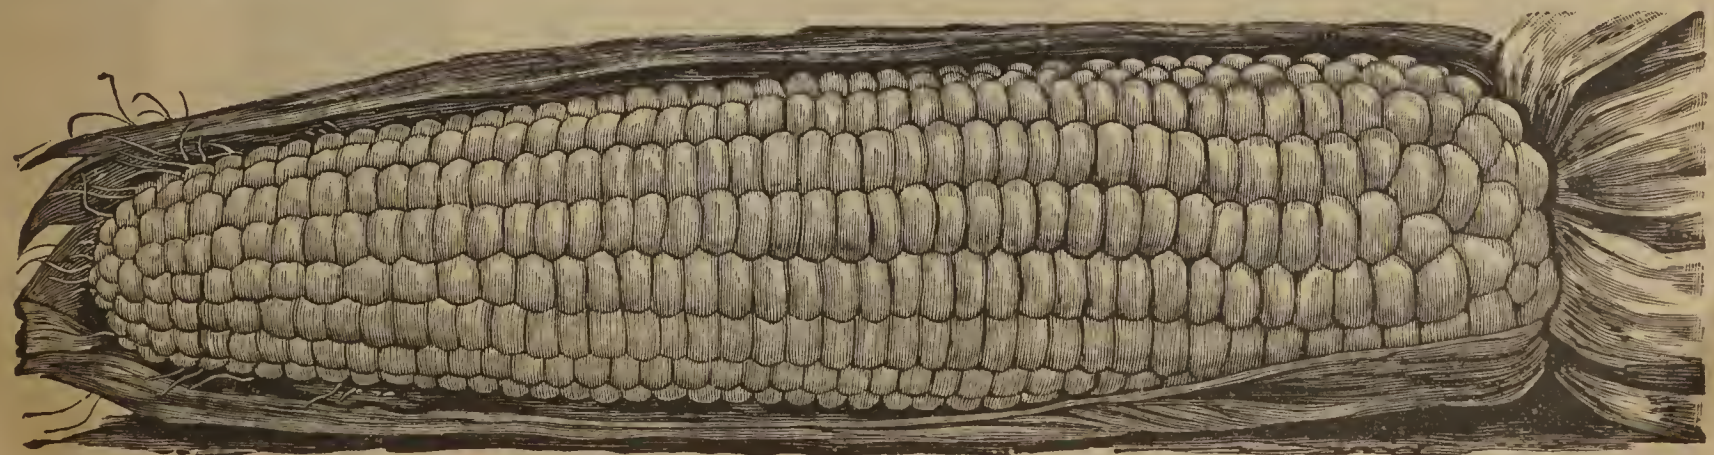

Here is a fine new variety that is an improvement in every way over the ordinary Golden Bantam. A week later than Golden Bantam; grows 4½ to 5 feet tall. Ears are larger and longer, and instead of 8 rows has 10 to 14 or 16 rows of tender, rich, full-flavored yellow kernels, somewhat lighter than regular Bantam. Produces almost twice the yield of Golden Bantam and in every way is a wonderful new Sweet Corn. Pkt. 15c; ½ lb. 30c; 1 lb. 50c, postpaid.

Buckbee's Private Stock Evergreen

Acknowledged the Best Standard Late Sweet Corn. Very tender, sugary, and remains a long time in condition suitable for cooking; coming into the market at a time when the main crops are being sold, these are very important conditions. For canning purposes, Private Stock Evergreen Sweet Corn will prove most satisfactory; its large ears, with long slender grains, make by far the most salable canned corn, and it out-yields all other varieties. Pkt. 10c; ½ lb. 25c; lb. 40c; 2 lb. 75c, postpaid.

Buckbee's Mammoth All Head

Entirely New and Distinct. The Most Wonderful Market Gardeners' and Shippers' Lettuce Known. The Best Smooth-leaved, Firm-heading, All-season Lettuce. Slow to Run to Seed, Unaffected by Hot Weather. A Sure Header and a Large Header.

Mammoth All Head is a great improvement on the well-known Big Boston Lettuce. It forms larger heads, more compact and tightly folded, and is about ten days earlier than either the white or black seeded variety. It is without the reddish brown tinge on the leaves and, furthermore, it can be sown all through the growing season, and stands heat remarkably well. Is slow to run to seed, and will not scald or burn and will make a head when other varieties fail. Mammoth All Head is one of the earliest, large Cabbage-Lettuces grown, forming heads in six weeks from sowing, and the heads grow to a large size, often more than 12 inches across, are solid and compact with few outer leaves; of an attractive bright light green color, never spotted or reddish in any part. They blanch creamy white, have decidedly buttery flavor and are crisp, tender and sweet. This is the grandest, most valuable Lettuce ever introduced. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 85c; lb. \$1.60; 2 lbs. \$3.00, postpaid.

Simpson's Early Curled

A decidedly crisp variety. Color, very light green; never spotted or brownish in any part. Quality excellent; sweet in flavor. Pkt. 5c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 60c; lb. \$1.10; 2 lb. \$2.10, postpaid.

Buckbee's Earliest Forcing

For those who like a large, thin, exceedingly tender leaf, and for those markets which demand a large loose cluster of leaves rather than a solid head, this is the best variety for forcing and growing in the open ground. The plants form a large loose head, rich light green in color and blanch nicely. The leaves are very much blistered and crumpled, crisp and are of excellent quality. This is the earliest of all Lettuce; it is a splendid shipper, of beautiful appearance and keeps in good condition better than any other sort. It is a money-maker for the market gardener, either if sown under glass or outdoors, and is very satisfactory for the home garden. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50; 2 lbs. \$2.75, postpaid.

Cos Lettuce

Cos Lettuce is distinct from other varieties, in having long, narrow, spoon-shaped leaves, folding into loose, sugar-loaf shaped heads which blanch better by having the outer leaves drawn about them and tied.

DWARF WHITE HEART OR CELERY—Noted for its most excellent flavor. Earliest in cultivation. The plants grow about 8 inches high and 4 to 5 inches across. Of stiff growth, every plant making a well-developed head of the most excellent flavor, and crisp and tender. Pkt. 5c; oz. 12c; 2 oz. 21c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25; 2 lb. \$2.25, postpaid.

BUCKBEE'S MUSHROOMS

Growing Mushrooms is Not Difficult

Get Reliable Spawn. Start Right and the Results Are Certain and Profitable.

We furnish every buyer of Mushroom Spawn with explicit directions for growing. If they are followed, nothing is so certain as big success.

The Mushroom is a delicious, edible fungus. It produces no seed, but instead a white fibrous substance in broken threads called spawn, which is developed and preserved in horse manure and pressed in form of bricks.

No expensive equipment is or ever will be necessary for the propagation. The plain fact is that anyone who starts right can grow Mushrooms successfully. An abandoned outhouse, or waste space in one, a shed, a basement or a cellar can be used for growing Mushrooms and will answer the purpose excellently.

We can safely assure all Mushroom growers, as well as those who have never grown any, but are on the point of trying it, that they will find Sure Crop Spawn to be all that is claimed for it and more. It produces Mushrooms true to type, in much greater abundance of much earlier maturity and of much larger size than those grown by any other method, and these Mushrooms are in great demand at the very highest market prices. In order to meet the demand for Sure Crop Spawn, and to provide against deterioration of its producing qualities, our arrangement with the producer is for frequent shipments which, coupled with the care we give it, renders it absolutely certain that our customers will all be furnished with Spawn that is fresh, of quick vigorous growth and if they handle it properly will bring them big returns.

THE WORLD'S UNBEATABLE WATERMELON

Buckbee's Monte Cristo—King of them all

The Sweetest Flavored Melon Known—The Best Variety for the Table—For Shipping and Long Keeping

In hundreds of markets every season it finds ready sale at good prices when all other sorts go begging for buyers. This grandest of all varieties has been extensively grown the past few seasons in almost every melon growing locality of the world, and in not one single instance has it failed to meet the expectations of the planter. The reports received from every section, that all are delighted with it, prove that in the hands of our customers Monte Cristo has given the same surpassing results as in our careful trials on Rockford Seed Farms.

The greatest yielder and the sweetest, juiciest, crispest and most solid Melon ever produced, never having a hollow or pithy center when ripe. The easiest to sell on the market, for when once tried, people will have no other. Many of our customers have written us, that they have cleared \$100 or more per acre by growing Monte Cristo Melons. Under average cultivation you can do as well or better. Will you not try it this year? This is an early variety, ripening about a week or ten days later than the extra early kinds offered in this book. It is a grand, good shipper, has a firm, solid rind, not too thick, yet will stand the most severe handling. The outside skin is of a rich, dark green color, shaded with faint stripes of a somewhat lighter color. Certainly the finest appearing Melon ever grown for market, shipping or table purposes. While our supply of seed is fairly large, we always have advance orders from our customers, who have planted Monte Cristo in past seasons and we would advise all who care to plant this "King of Melons" to place their orders as early as possible. Buckbee's
Prizetaker

Buckbee's Golden Sweet Spanish

Buckbee's Pedigreed Large Red Wethersfield Onion

Buckbee's Prizetaker

Beautiful Color—Ideal Size—Uniform Shape—Exceptionally Good Keeper—
Wonderful Flavor—Always at Its Best.
Unexcelled for Home Use or the Market.

Genuine Prizetaker Onion has proved itself to be one of the handsomest and most productive large Yellow Globe Onions which are grown extensively today. It grows as easily as any other sort, and can be used for all purposes—the young plants as salad, the half-grown bulbs in early summer, and the perfect mature Onion practically at all times, for it keeps so well that it may be used almost the year around. It is esteemed not only in America, but in foreign countries. Soon after its introduction it was exhibited in London, and in the keenest competition with the products of the most skillful growers, earned an "Award of Merit" from the Royal Horticultural Society of England. Not only does it grow to a large size, but uniformly so. The shape is true globe, broad at the base, tapering sharply at the top. It is so well bred that the tops dry down entirely when it ripens, leaving a clean, sound bulb, perfect in form, rich in color, and wonderfully solid. The outer skin is rather pale yellow, the flesh pure white throughout. It is extremely mild in flavor, very much esteemed for slicing, baking and boiling; in fact, in whatever way it is prepared, it is unsurpassed. Pkt. 10c; oz. 20c; 2 oz. 35c; ¼ lb. 65c; ½ lb. \$1.20; lb. \$2.10; 2 lbs. \$4.00, postpaid.

Australian Brown

This sort is distinct from all other Onions. Is uniform in size and shape, wonderfully hard, solid and heavy, and will keep almost indefinitely. Ripens extremely early and never makes scallions. It is of medium size, round, with skin of a deep amber-brown; flesh white, mild and agreeable. A sure cropper. Pkt. 5c; oz. 20c; 2 oz. 30c; ¼ lb. 50c; ½ lb. 95c; lb. \$1.75; 2 lb. \$3.25, postpaid.

Buckbee's Selected Yellow Globe Danvers

Our strain of Yellow Globe Danvers, developed by careful selection and breeding, is pedigreed stock of the highest type, far superior to the seed mostly offered by others. This stock produces bulbs of fine symmetrical shape, large size, average specimens weighing from 1 to 2 lbs. each. These bulbs have small necks and ripen evenly. The skin is a light golden brown; the flesh is finely grained, pure white, crisp, mild and of excellent flavor. It is a grand, magnificent keeper and shipper. Frequently produces 800 bushels or more to the acre from seed. About a week earlier, but not quite so large nor so perfectly globe-shaped as Southport Yellow Globe. Our own growth, choicest Northern-grown, high-grade, pedigreed stock seed. Pkt. 10c; oz. 20c; 2 oz. 35c; ¼ lb. 65c; ½ lb. \$1.20; lb. \$2.10; 2 lbs. \$4.00, postpaid.

Buckbee's Golden Sweet Spanish

Color is a light yellow or straw color, the flesh pure white of very fine grain and exceptionally sweet. As Denia is nearly twice the size of Prizetaker, so is our new Sweet Spanish twice the size of Denia. We have seen 7 Sweet Spanish Onions set side by side on a yardstick and reach from end to end. These same 7 Onions weighed over 16 lbs. An exceptionally good keeper, and if allowed to dry thoroughly, will stand shipping long distances. The size, however, is not the best feature—it is its sweet mild flavor. Pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 80c; ½ lb. \$1.50; lb. \$2.75; 2 lbs. \$5.25, postpaid.

Buckbee's New Golden Globe Danvers

Long Keeper, Best Shipper, Unrivalled Market Onion. Always in the Lead, Challenges Competition

A most perfect type of the globe-shaped Onion and an extra early variety. It has a very small neck, the entire crop drying down at one time. The bulbs are of a beautiful golden yellow color. Trial tests have shown this great variety to yield over 2,000 bushels per acre while under ordinary cultivation in past seasons several of our customers have reported yields of 1,000 bushels per acre. The bulbs are very hard, solid and are exceptionally good keepers.

Remember that we control the entire supply of this variety. Our own growth, choicest Northern grown, high-grade pedigreed stock seed. Pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 85c; ½ lb. \$1.60; lb. \$3.00; 2 lbs. \$5.75, postpaid.

Buckbee's Pedigreed Large Red Wethersfield

Deep Purplish Red Color. Mild, Good Size, Flat.

The bulbs are large, flattened, but quite thick, with rich dark purplish skin and pure white flesh of good mild flavor. Our stock is saved from carefully selected bulbs only, and produces larger crops than any other American red onion and these bulbs keep better than those of any other sort. Our strain of Red Wethersfield is the earliest and most prolific known, and has proven a great money-maker to the grower. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; lb. \$2.00; 2 lbs. \$3.80, postpaid.

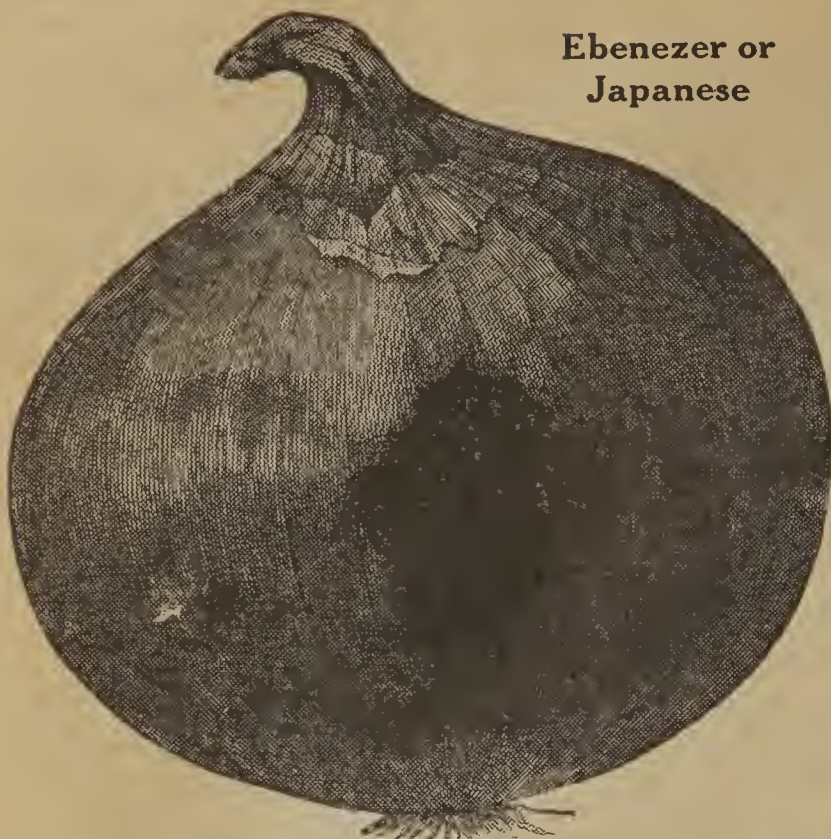

Buckbee's New Denia

Large, Productive, Sweet, Attractive. Mild Flavor. Sometimes Called an Improved Prizetaker But It Would Take Two Prizetakers to Make One Denia

The New Denia is a wonderful onion, of beautiful color, uniform shape, heavy weight and sweet, mild flavor. With the exception of New Sweet Spanish, this is the heaviest onion ever grown. Very handsome and productive, of perfect globe shape which always comes very uniform. Color bright, clear, straw yellow. Have very little neck, but ripen up firm and solid. A wonderfully good keeper for so early a variety. Flesh is pure white, very fine grain and so sweet that it makes a splendid sort to use in salads and other ways without cooking. Equally desirable for the home garden or for one who grows for the market. Send to us for choicest stock seed. Pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 85c; ½ lb. \$1.60; lb. \$3.00; 2 lbs. \$5.50, postpaid.

Genuine Bermuda Onions

BERMUDA Onion Seed

Bermuda Onions are largely grown in the South and have proven a most profitable crop. They are planted there in the fall and shipped North in May and are the earliest large new Onions in the market. Growers can do equally well with them in the North. They are the quickest growing Onions known. Sown at the same time as Danvers and White Portugal, they will produce full grown bulbs about 3 inches in diameter when the others are only 1 inch in size.

CRYSTAL WHITE WAX—This new variety is a large, pure-white flat Onion. It is the earliest and most popular Onion with the large growers in the South. It produces the mildest and sweetest Onions of them all. It is very fine for slicing, the color being so clear and pure. Our stock seed each year is imported direct from Canary Islands, where the only True Bermuda Seed is grown. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 70c; ½ lb. \$1.25; lb. \$2.35; 2 lbs. \$4.50, postpaid.

BUCKBEE'S "FULL OF LIFE" ONION SETS

Buckbee's New Yellow Potato

Excellent for Green Bunching Onions—Very Early and of Rich, Mild Flavor
Of golden yellow color, excellent quality and good keepers. The bulbs produce clusters of small ones, often as many as twenty from a single bulb. Onions are ripe much before any other variety. Excellent for Green Onions and also for pickling. This is the Onion to plant for all purposes. We have grown an unusually fine lot of sets this year and although there is a short crop, the quality is the finest we have ever had. Postpaid, ½ lb. 20c; lb. 35c; 2 lbs. 65c.

Egyptian or Perennial Tree Winter Sets

This variety never forms a large bulb. Its value lies wholly in its special adaptability to produce green Onions for Spring or Fall uses. It is perfectly hardy, and when once set out will come up year after year. Should be planted in the Spring. We also supply these sets for shipment September 1. This variety increases by producing sets at the top of the stalk and does not produce seed. Postpaid, ½ lb. 17c; lb. 30c; 2 lbs. 55c.

Bottom Onion Sets

Bottom Onion sets produce an Onion ready for market or the household from 4 to 6 weeks earlier than can be done by sowing the seed, and the product of the set is identical with that of the seeds. This gives the market gardener ample time to sell his entire crop at the early high prices and permits the sowing of another crop on the land the same year. Every private garden should contain a sowing of sets.

Because of its earliness, easy cultivation and great productiveness it is the best variety for farm use, for fattening hogs and other stock. In harvesting, the nuts hang to the vine and tops and nuts are fed together as a complete hay and grain ration. This variety has also a commercial value over that for feeding; it is the kind mostly used for Peanut candy and salted Peanuts and is also the best for oil, containing 10 per cent more oil than others. The pods may also be broken in 2 parts, soaked in water and then planted at once. The larger varieties are mostly planted shelled at the rate of 1/2 bushel per acre. In bright weather they will be cured in 24 hours. They must be pulled before frost.

Its important features are:—Earliness, Large Size, Perfect Shape, Solidity, Handsome Color (which is rich red), Productiveness, Everbearing, Fine Flavor, Best Keeper, Splendid Shipper.

Without question—the King of All Tomatoes—and unqualifiedly Superior to any other variety grown, for market, for family use or canning. It is a sturdy healthy grower and is practically Everbearing, yielding enormous quantities of tomatoes always smooth and handsome until killed by frost. For a main crop there is no variety that can equal Buckbee's Beefsteak, and it is particularly desirable for large growers and shippers as it stands rough handling well, while its beautiful bright red color and handsome shape makes it very valuable as a market sort. It never fails to please every one, the amateur as well as the market gardener.

We supply over 150,000 of our customers with Buckbee's Beefsteak Tomato Seed annually. This speaks for itself, and substantiates our claim that Buckbee's Beefsteak is the "King of All Tomatoes," and the most extensively planted of any variety.

BUCKBEE'S "Full of Life" TOMATOES

Buckbee's Earliest Market

The Earliest Large Smooth, Scarlet Tomato in Existence. Indispensable to the Market Gardener. A Great Money-Making Tomato.

This variety bears fruit which in size, shape, color, solidity and quality compares favorably with the noted later kinds, and by repeated trials at Rockford Seed Farms and elsewhere has demonstrated that it ripens up a large portion of its crop the earliest of any variety. It is, without question, the earliest good, large scarlet Tomato. Gardeners and Tomato fanciers will readily see the advantage obtained over their competitors by growing Earliest Market. This is the variety which will give them the opportunity to be first on the market with a large crop of beautiful large fruits, selling readily at good prices.

Compared with the well-known Earliana, Earliest Market is about a week earlier, the fruits are fully as large, smoother, have no hard core, while Earliana is often rough and has large seed cavities. Furthermore, Earliest Market is much more prolific. An excellent kind also for the home gardens, and if you have not given this wonderful variety a trial, be sure to include it in your order for 1937. Pkt. 10c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25; ½ lb. \$2.30; lb. \$4.40, postpaid.

Too much praise cannot be given this Tomato, as it is in a class by itself, being equally desirable for any use for which Tomatoes are grown. Its perfect shape and color commend it to the market; its size, quality and flavor make it one of the best for all table uses, and its earliness, solidity and productiveness make it valuable for the canner. It is surely a wonder Tomato, and can be used for market canning or home garden. The vines are strong growers, but not rampant enough to decrease the yield of the fruits. On the contrary this New Tomato is one of the heaviest yielders we have. Color is a rich, bright crimson and penetrates clear through the fruit. There are few seeds, making nearly solid flesh. Pkt. 10c; ½ oz. 20c; oz. 35c; 2 oz. 60c; ¼ lb. \$1.00; ½ lb. \$1.85; lb. \$3.50, postpaid.

This wonder Tomato should produce a crop on any land in any State in the Union. In size and shape very similar to the well known Stone, but will yield nearly twice as many Tomatoes as the bearing season is continuous. Fruits are very solid, firm, smooth and of fine flavor. Buckbee's New 50-Day Tomato

The Largest Fruited, the Smoothest, the Finest in Quality of all Extra Early Scarlet Tomatoes

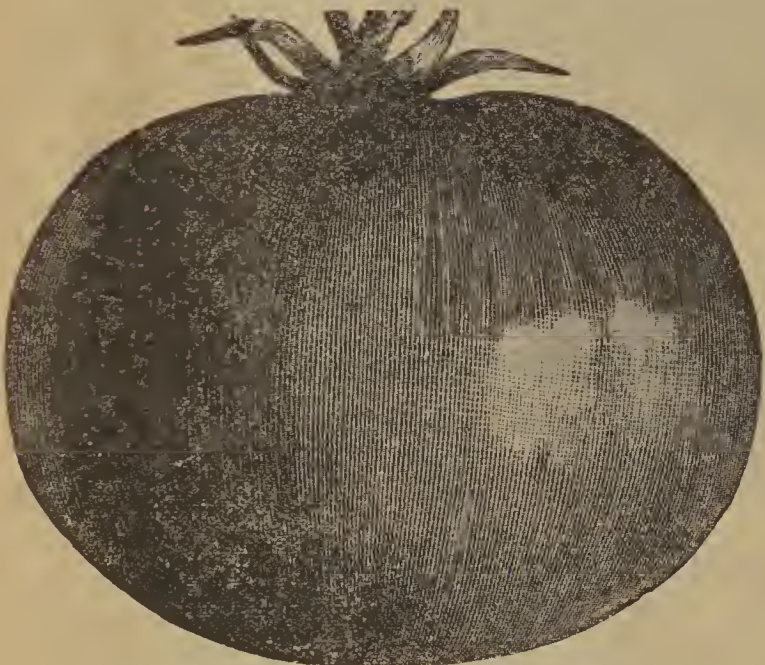

Originated on our Rockford Seed Farms. Called 50-Day Tomato because it produces large, ripe fruits on strong plants in 50 days from time they are set in the open ground.

The vines are short, very vigorous, enormously productive and ripen a very much larger crop at the early part of the fruiting season than any other extra early variety. The fruits are globular, always entirely free from cripples, wrinkled or cracked fruits, and weigh on an average about 5 oz. each, although many fruits as heavy as 6 ½ oz. each and over have been found in our fields. The color of the fruits is a beautiful bright scarlet. They ripen evenly, well up to the stem, have no hard core, small seed-cells, and are practically all heavy, solid meat of mild and most delicious sweet flavor. The skin is thin, but very tough, making it a splendid long-shipping variety.

* Compared with Earliana, 50-Day is a much heavier cropper and its fruits of much larger size, smoother, of better quality, containing less seed and more meat. They are of better appearance and therefore better sellers; furthermore, they ripen practically as early. Fifty-Day will soon replace Earliana, and should also be planted in place of second early sorts like Bonny Best and Chalk's Jewel, being earlier, more productive and producing fruits fully equal in size, beautiful appearance and of better quality; only Earliest Market is a few days earlier than 50-Day, but has somewhat smaller fruit. Price, Pkt. 10c; oz. 50c; 2 oz. 90c; ¼ lb. \$1.50; ½ lb. \$2.60; lb. \$4.75, postpaid.

Buckbee's New Monarch Wax Bean

BEANS

Buckbee's New Monarch Wax

The Only "Sure Crop" Wax Bean Ever Grown. Heavy Yields. Entirely Stringless. Large Pods. Beautiful Color. Sure Cropper. Crisp and Tender.

Our New Monarch Wax Bean is a very sturdy and vigorous grower and as near rust proof and disease resistant as it is possible for a bean to be. One of the earliest wax beans ever grown, starting to bear within 60 days after planting and continues its bearing season longer than most others. Pods are of splendid quality, fleshy, and are stringless at practically all stages of their growth. From 6 to 7 inches long by ½ inch through and almost round, they make a wonderfully heavy yield, and the beautiful golden yellow color sells them easily. Seed is long, oval, medium size and purplish black color. In common with other black-seeded varieties, this bean may be planted quite early in the season. Practically rust proof, owing to the habit of the plant which branches freely but is perfectly sturdy and upright, every branch carrying a head of magnificent pods. As nearly all of the pods are produced underneath the foliage, excessive heat does not affect it in the least, a very valuable feature whether grown for home, the market garden or for shipping long distances. As a canning bean Buckbee's New Monarch is without an equal, as the pods are long enough to fill the jar and the beautiful color is retained after cooking. We control the entire stock of Buckbee's New Monarch Wax Bean. Send to Buckbee's for choicest stock seed of our own growing; especially selected for disease resistant qualities. 2 oz. Pkt. 10c; ½ lb. 25c; lb. 40c; 2 lbs. 70c; postpaid.

Two ounces of Beet Seed will plant a row 100 feet long.

Buckbee's New Vigorosa Peas

BUCKBEE'S "Full of Life" PEAS

Buckbee's New Vigorosa

This grand, exceptionally good, new Pea is beyond all reasonable doubt by long odds the very best Second Early variety that has ever been introduced. The extended history of Pea culture gives us no example of a production anything near the equal of Vigorosa. It is absolutely unparalleled. No bushing at all is required. The vines grow to be but 20 inches tall and are so stout they bear immense crops without failing. As an enormous yielder the New Vigorosa ranks first, and has no close rival. When it comes to quality—well, that is one of its many strong points. No one who knows the merits of real Peas could possibly find fault with it. It pleases critical judges, which means it is all that we claim for it. Those of our customers who have tried it say it is better than we represent it to be. 2 oz. pkt. 8c; ½ lb. 20c; 1 lb. 35c; 2 lb. 65c; postpaid.

Buckbee's New Extra Early Honey Sweet

New Honey Sweet Peas will grow and mature quicker than any other sort in cultivation. This, with the fact that they can be planted as soon as the ground can be worked, makes it possible to get into the market with this Pea sooner than with any other variety known. A wonderful luxuriant grower and a splendid drought resister. The vines attain a height of 24 inches, do not require sticking. Prodiggally prolific, the pods are from 2½ to 3 inches long, nearly round, and are always well filled. The peas are freely borne, and remain in good condition for a number of days. The pods are of a dark green color, well filled with luscious peas. The peas themselves are of first-class table quality, and retain their color and attractive appearance after cooking. It is entirely adapted to the purposes of the market gardener, and does equally as well in the home garden. 2 oz. pkt. 10c; ½ lb. 22c; lb. 40c; 2 lb. 75c, postpaid.

Buckbee's Potlatch or Big Dinner

The Best Main Crop Variety of Large Podded Dwarf Peas

Potlatch is Chinook Indian for Big Dinner. The vines are sturdy and vigorous, growing about 20 inches high, with coarse and unusually dark green foliage which can be distinguished from that of other peas a quarter of a mile away. The pods, which are borne in pairs, are long, often measuring 6 inches or more. They are broad, pointed, rich dark green in color and in size and fullness fully equal to those of the Tall Telephone Pea. They contain 9 to 11 Peas, which are very large and in sweetness and flavor rank with the finest. Potlatch is a wonder of productiveness and the way the Peas shell out is astonishing. Potlatch is a second early, dwarf, very large podded Pea; it has become the leading and most popular variety of its class. 2 oz. pkt. 8c; ½ lb. 20c; lb. 35c; 2 lbs. 65c, postpaid.

New Early Gradus or Prosperity

The Earliest, Largest Podded Wrinkled Pea

Gradus is probably the most popular of all the extra early wrinkled Peas. It has taken the place of the smooth early Peas to a great extent. It grows from 3 to 3½ feet high, requiring no sticks or brush, but sticks may be used if preferred. The Vines are of pale green color and bear in great profusion from top to bottom immense round, dark green pods, 4½ to 5 inches long, well filled with from 8 to 10 or more Peas of delicious quality as large and as rich in flavor as the Telephone Peas, and these Peas can be had only a few days later than the small extra early Peas. 2 oz. pkt. 10c; ½ lb. 20c; lb. 35c; 2 lbs. 65c, postpaid.

Laxton's New Progress

Dwarf, Early, Large and Delicious. The Finest Pea Ever Grown

This new Pea is without question the very finest of the large podded dwarf, early Peas. Of the same type as Giant Laxtonian, this Pea will mature several days earlier and produce a much heavier crop. Vines are dwarf, only 15 to 18 inches high, and the pods, which are rich dark green are 4½ inches long and always crowded with large dark green Peas of finest quality. We believe this is the earliest large podded dwarf Pea, and just what we have all been waiting for. 2 oz. pkt. 10c; ½ lb. 20c; lb. 35c; 2 lb. 65c, postpaid.

Thomas Laxton

Extra Early Large Podded Sweet Wrinkled Pea

The rival to the famous Gradus—as a long-podded, extremely early wrinkled Pea. The growth is identical but the pods are deeper, richer green, square at the end and contain more Peas. In the opinion of some experts, Thomas Laxton is even sweeter and finer in flavor, while as the large Peas are of a deeper green, they present a more attractive appearance on the table. The crop ripens only 3 to 4 days after Gradus. A splendid market gardener sort, but especially recommended for the home garden. 2 oz. pkt. 8c; ½ lb. 20c; lb. 35c; 2 lb. 65c, postpaid.

Rose Growing Made Easy

Don't Bother with Budding or Grafting. Briar is Always a Nuisance.

With roses on their own roots, there is never any of this trouble. Should the bush be cut down by frost at any time and the roots not harmed, real rosewood is again produced in the spring. On the other hand, many amateurs have set out to plant a rose bed and secured the best of budded stock but in a year or two have had only briars for their trouble. All our roses are grown on their own roots.

CHRYSANTHEMUMS

Hints on Growing Chrysanthemums

The plants may be set out any time the ground can be worked, from early spring until the first of July. They prefer a sandy clay soil with a mixture of well-rotted manure. Chrysanthemums are gross feeders. Do not allow more than four shoots to grow, and remove all lateral buds, leaving the main bud untouched. If the flower buds form in early summer or spring, remove them. This will not interfere with autumn blooms. The Pompon or Button varieties do not need disbudding.

NEW BUDDLEIA HARTWEGI

A 1937 INTRODUCTION

Buddleia Hartwegi is undoubtedly the finest of all summer flowering Butterfly Bushes. As a summer cut flower plant and as an ornamental lawn shrub it is unsurpassed in beauty and usefulness. The large bright lavender panicles have remarkable substance and harmonize in arrangement with other summer flowers. The flowers do not "sunburn" as do the other varieties, and the tip flowers on the panicle open before the basal flowers have faded. The individual flowers are closely spaced on the panicles, imparting a compact and pleasing appearance. The foliage is very heavy and is rich dark green. Buddleia Hartwegi is hardier than any of the summer flowering Butterfly Bushes, having lived through the severe winter of 1935-36 without protection and with only slight loss. 60c each; 3 for \$1.50, postpaid.

BUCKBEE'S "Full of Life" TOMATO SEEDS

NEW TOMATO ABRAHAM LINCOLN The Giant of all Tomatoes

THE NEW TOMATO—ABRAHAM LINCOLN—This world-beating Tomato was originated on Rockford Seed Farms and named in honor of Illinois' greatest son—Abraham Lincoln. This Giant of All Tomatoes was introduced in 1923 and is the largest Tomato ever grown. We have had 9 tomatoes in a single cluster with a total weight of 7 pounds; the average weight is about a pound and we have grown many weighing nearly 3 pounds. Beautiful dark red, attractive fruits, heavy, large, sweet, solid and meaty with very few seeds. For so large a tomato it is remarkably smooth and free from cracks and seams.

THIS NEW TOMATO—ABRAHAM LINCOLN—usually bears fruit in clusters of from four to six; the individual fruit, 5 to 7 inches in diameter, runs remarkably uniform in size and shape, being almost round, solid and weighs about one pound each, or heavier than any other tomato grown; the surface is very smooth and seldom cracks; the color, a rich blood-crimson, also permeates the flesh to the very heart; it ripens thoroughly, coloring up clear to the stem.

THE NEW TOMATO—ABRAHAM LINCOLN—possesses one crowning merit, the phenomenal solidity of the flesh. Even the seeds, which are small and few, are embedded in flesh of meaty firmness.

THE NEW TOMATO—ABRAHAM LINCOLN—has superlative merit; it is a sturdy, healthy grower with distinctive bronzy-green foliage; it ripens its first fruits immediately following those of the early sorts and from that time until frost it is practically ever-bearing, yielding enormous quantities of tomatoes, no other variety approaching it in productiveness.

THE NEW TOMATO—ABRAHAM LINCOLN—on account of its solid character, splendid quality, rich red color of the flesh, and its appetizing appearance, is absolutely unsurpassed for slicing, salads and table use generally, while it is equally superior for baking, boiling and canning—the solidity of flesh and minimum of juice make thickening unnecessary.

THE NEW TOMATO—ABRAHAM LINCOLN—as a market variety, has already become very popular; its general merit and handsome appearance can not but attract buyers, and it is so solid that it "holds up" well when shipped, even though it does not have the thick, tough skin heretofore considered the most important requisite in a shipping tomato.

Seed of The New Tomato Abraham Lincoln can only be obtained from the originator, Rockford Seed Farms. Seeds are bred for disease resistant qualities. Pkt. of 300 seeds 20c; 3 pkts. 50c; ¼ oz. \$1.00; ½ oz. \$1.75; 1 oz. \$3.00, postpaid.

New Ox Heart

Large Pinkish Purple Fruits Often Weighing A Pound or More. Fruit Very Solid and of Fine Quality. Matures in 105 Days

Being almost seedless the flesh of Ox Heart grows nearly two inches thick, without a seed cavity, making it ideal for salads and for slicing. The flavor and quality is unequalled. Although not a very heavy yielder, market gardeners will find it a profitable variety to grow, as their attractive appearance assures their ready sale. Fruits grow in clusters of from 3 to 5. Because of its attractively different shape, large size and good keeping qualities, it is fast becoming a favorite everywhere. The weight is heavy. 1½ pounds being very usual, while 3 pound fruits are nothing uncommon, and 5 pound fruits have been seen. The Ox Heart shape can be depended upon on all but the very heaviest specimens. Pkt. 10c; ½ oz. 40c; oz. 75c; 2 oz. \$1.40; ¼ lb. \$2.50; ½ lb. \$4.75, postpaid.

Cultivated extensively and with profit in the South for the tops, which are used and are most excellent for greens. It is very hardy, will grow all winter, but will not produce a good root. In many sections of the South it is also a favorite green feed for stock, and its use as a pasture crop like rape is quite general. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 35c; lb. 55c; 2 lbs. \$1.00, postpaid.

CERTIFIED HYBRID SEED CORN (NORTHERN ILLINOIS GROWN)

Our Hybrids will be certified seed. This means that the inbred parentage has been grown under the inspection of the United States Department of Agriculture and the Crop Improvement Association of the University of Illinois. They have checked the development of our inbreds over the last eleven years and have personally inspected the crossing and isolation of the breeding plots. They have checked the performance of the Hybrid to check their adaptability in this section. Some Hybrids are not as good as open pollination corn and, no doubt, much humbug hybrid seed will be offered for sale. Unfortunately there are no laws protecting you. The certification work was undertaken to protect farmers of Illinois from swindle by unscrupulous producers.

Hybrid Corn assures the grower of a larger yield, stronger stalk and root system; better quality grain, much more resistant to heat, cold, drought and various corn diseases. A good Hybrid Corn should give an increased yield of 20% over regular Corn. 1 lb., 45c; 3 lbs., \$1.25. Write for description and prices on larger quantities.

Out of the leaf joints grow numerous laterals which continue the display of blooms long after the main flowerhead has disappeared. Several weeks longer blooming than is the case with other Phlox is the result. 50c each; 3 for \$1.25, postpaid.

PREMIER (Extra Early). Premier begins to ripen early and bears over a very long season, producing unusually large crops of large to very large berries, uniform in size and color. The foliage is healthy and not subject to disease. Berries have a beautiful red color, they are solid, meaty and of elegant flavor. It is very hardy and resists frost.

SENATOR DUNLAP (Second Early). Flesh is meaty, firm, berries a beautiful bright red color, unusually productive, a good canner, a splendid keeper and shipper, and sugary flavor! Produces a crop under positive neglect!

GIBSON (Early). Berries of extra large size, bright red color, fine texture, rich, sweet flavor, keep well and ship well! Big yielder. Likes a mellow soil.

The Great New Gem Everbearing Strawberry

The New Gem is the most outstanding introduction since Mastodon and its many fine qualities will soon make it the leading market variety of Everbearers.

Gem has every other Everbearer beaten for quality and flavor. The fruit is well shaped and uniformly large. It is sparkling red in color, rich, and about the sweetest berry we have tasted. Unsurpassed for keeping qualities and the firmness of the fruit will permit its being handled for long-distance shipping, even during hot weather. Fruit buyers last season took Gem ahead of any other Everbearer.

The New Strawberry Raspberry

Bush from 18 inches to 2 feet in height, entirely hardy and impervious to heat and drought. Berries are larger than the largest Strawberries, bright, shining scarlet, with an exquisite bloom. **MAKES DELICIOUS JELLY, JAMS AND TARTS**, having a delicious flavor entirely different from any other fruit. Price, 3 for 55c; doz. \$2.00 postpaid.

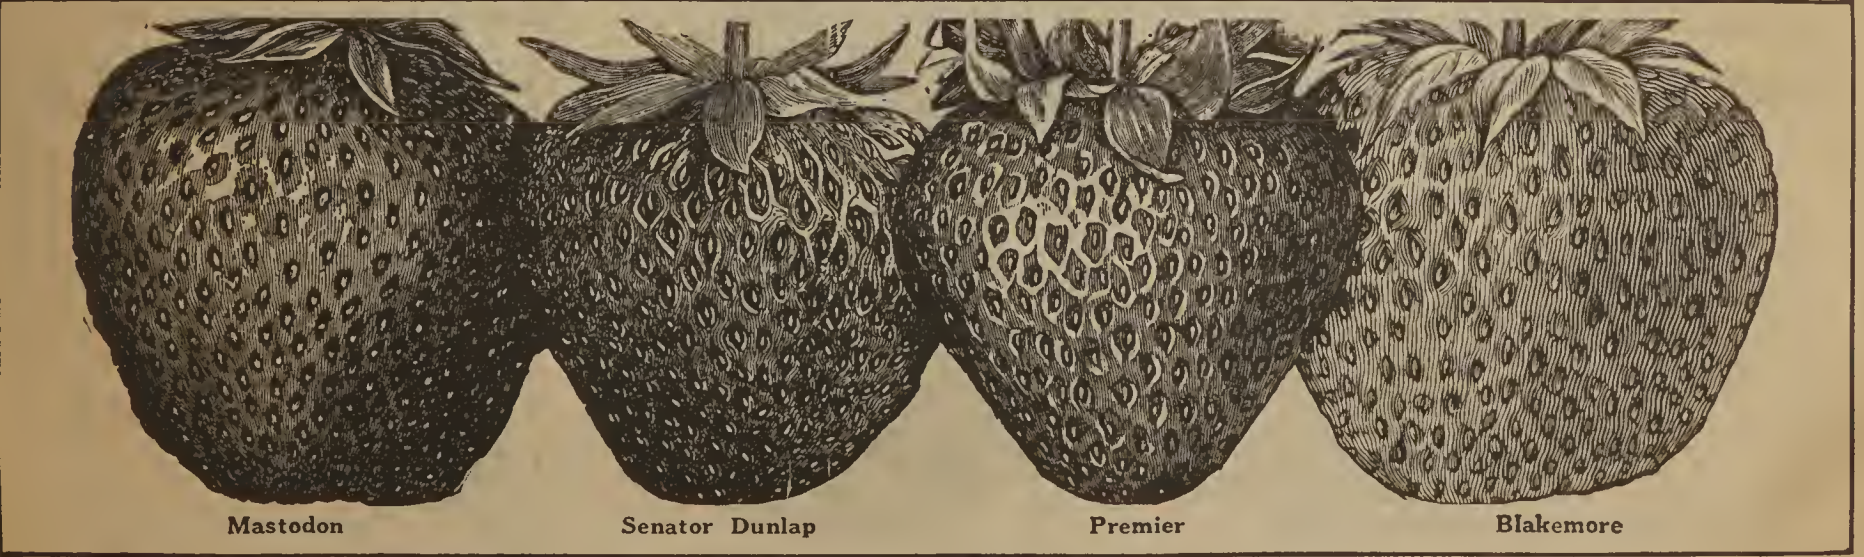

FAIRFAX (Extra Early). U. S. Dept. of Agriculture No. 613. Fairfax has yielded 5,120 quarts per acre, grading 90% good to fancy. Some record! In quality, Fairfax is said to have set a new standard for strawberry flavor, with its unusual sweetness. Berries are large size and ideal for the home or market. Be sure to plant it this year.

DORSETT (Extra Early). U. S. D. A. No. 633. Its vigor, productivity and rich flavor are outstanding! Berries are bright red color, large size, firm, and sugary sweet. Has yielded 6,640 quarts per acre, grading 83% good to fancy! While a good shipper, Dorsett is also a splendid home variety. Especially valuable for heavy soil! Resistant to disease!

Mastodon Everbearing Mastodon has been producing its enormous crop of big berries during the summer and fall months for the past 16 years, proving that the prolific and everbearing habits that have made it so popular are permanently fixed.

Mastodon is a great money maker, as it will produce a paying crop with just ordinary care.
